

Corporate Profile

10 Years Old

Established in 1998, F1F9 is today a leading financial modelling services firm.

Unique

We are unique in several ways. Starting in 1998 we pioneered a uniquely transparent and maintainable modelling methodology, an approach referred to as the F1F9 Standard and now promoted as the FAST Method through the FAST Modeling Alliance.

Moving to New Delhi in 2005 we then pioneered the provision of offshore modelling services to onshore professional modelling firms, known as Business Partners.

Collaborative Modelling™

Combining the FAST Method with our proven ability to deliver high quality, efficient offshore modelling services, we are now promoting a revolutionary Collaborative Modelling™ concept. Collaborative Modelling™ allows the traditional, often amateur, one-man modeller-analyst role to be shared between a professional modeller at our end and a professional analyst at your end. The 4-eyes principle has finally become a practical reality for the financial modelling profession.

Among the Biggest

Based at our 5,500 sq ft state-of-the-art office in Gurgaon (30 minutes south of New Delhi airport) we currently boast a staff of 21 financial modellers, 9 of whom have more than 2 years experience with F1F9. This makes us among the largest, most experienced financial modelling teams in the world.

FAST Conversion

From our New Delhi base we offer our worldwide Business Partners and professional end clients a range of financial modelling services, including FAST Conversion & Upgrade, Ongoing Update & Maintenance, and Integrated Actuals & Forecast Modelling. For details please see www.f1f9.com

Experience

To date we have undertaken more than 100 modelling assignments for some of the world's most financially sophisticated companies. Among our firsts are: developing the first PFI operational models back in 2000, completing the first bulk model update assignment in 2007 (48 projects in 2 months), and delivering time zone driven, seamless 'relay' modelling on a major infrastructure project, also in 2007.

Management

The firm is lead by Morten Siersted (CEO) with Shiv Dayal as Deputy CEO and Chairman of the Board.
